Exam : **C2040-985**

Title : **Developing IBM Lotus Notes
and Domino 8.5 Applications**

Vendor : **IBM**

Version : **DEMO**

NO.1 Bram needs to change a large number of documents in an existing application and add the three fields from the Document NewDoc to each existing document. He has created a document collection of the documents to be changed.

How can he best achieve this?

- A. Call Collection.StampAll Multi(NewDoc)
- B. Call Collection.Stampall (NewDoc)
- C. Call Collection.StampallMulti ("location" : "HomeID" : "HelpNr" ; "NY" : "123" : "80012345678")
- D. Call Collection.Stampall ("location" : "HomeID" : "HelpNr" ; "NY" : "123" : "80012345678")

Answer: A

NO.2 Olga wants to have one action on the Video form that will give the options to Print, Save, and Exit the document when it is clicked.

In which one of the following ways can she accomplish this?

- A. Use Hide/when formulas along with a database profile field setting to display "toolbars" of icons.
- B. Layer the actions in the Action menu.
- C. Use action buttons within an Outline control in a hidden frame to present "twisties".
- D. Create a parent action with programmable subactions.

Answer: D

NO.3 A button on a Notes document has the following LotusScript code:

```
Dim workspace As New NotesUIWorkspace Dim uidoc As NotesUIDocument Set uidoc = workspace.CurrentDocument Call uidoc.GotoField("Status") Print "Approved" Where will the word "Approved" appear after the button is clicked?
```

- A. In the "Status" field of the current document
- B. On the status bar
- C. In the server's log.nsf file
- D. In a messagebox

Answer: B

NO.4 The XML representation of a Domino database, including its design and data, is known as which of the following?

- A. XMLD
- B. DXML
- C. DominoXL
- D. DXL

Answer: D

NO.5 Hans and Kristen, two mobile users, are editing different fields in the same document during a parallel review.

The designer set a form property to merge replication conflicts.

Which one of the following will happen?

- A. Edits to each field will be saved in a single document.
- B. Edits to both fields will be saved in a single document marked as a replication conflict.

C. Edits to each field will be saved in two documents: one a main document and the other a response document marked as a replication conflict.

D. Edits to both fields will be saved in two identical main documents.

Answer: A

NO.6 Management has asked Bob to post an introductory Welcome page when Notes users first open the Video application.

In which one of the following places should Bob put the Welcome message?

A. In a document named \$Welcome

B. In the application Using Document

C. In the first Page in the application design

D. In the application About Document

Answer: D

NO.7 Geoff has recently upgraded to Notes Domino 8.5 and has been exploring the various options within Domino Designer in Eclipse (DDE).

What can Geoff do to see his Applications within the Applications Navigator of DDE?

A. Right-click on an Application icon from the Notes workspace and select Open in Designer. The Applications Navigator always opens in the left pane, just as in Domino Designer 8.0 and earlier releases. Other views, such as Outline can be moved or closed if desired.

B. Right-click on an Application icon from the Notes workspace and select Open in Designer. If the Applications Navigator is not visible, select Window > Show Eclipse Views > Applications. Other views, such as Outline, can also be moved or closed.

C. Right-click on an Application icon from the Notes workspace and select Open in Designer. The Applications Navigator always opens, but it can be repositioned. Other views, such as Outline can be moved or closed if desired.

D. Right-click on an Application icon from the Notes workspace and select Open in Designer. If the Applications Navigator is not visible, select Window > Show Hidden Views > Applications. Other views, such as Outline, can also be moved or closed.

Answer: B

NO.8 Janet uses Domino Designer's Dynamic Help feature to clarify something.

What kind of help will she get?

A. A personalized search interface that remembers all of her previous searches and their results.

B. A wizard that follows a support tree to narrow down the answer to her question.

C. A context-sensitive Help View that constantly updates a list of possible relevant topics based on what she's doing.

D. An animated, talking icon that offers to assist her.

Answer: C

NO.9 Joe wants to store JavaScript code in his forms so that the code can be called from other events on the form.

Where should he put the code?

A. In the form's HTML Body Attributes event.

- B. In the form's JS Global Functions event.
- C. In the form's onLoad event.
- D. In the form's JS Header event.

Answer: D

NO.10 James would like to use profile documents to track individual users' preferences when they access his Web site.

How can he collect the user preference information and create a new profile document?

- A. Have users enter their preferences in a form via the browser and then create the profile document using @Command([SetProfileDocument]) in the WebQuerySave agent.
- B. Create a link to open a profile document using @Command([CreateProfileDocument]) and have users submit the form.
- C. Have users enter their preferences in a form via the browser and then create the profile document using @Command([SetProfileField]) in the \$\$Return field.
- D. Create an action button on a Web page and use @Command([CreateProfileDocument]).

Answer: C
